Here are my BERA comments thus far. They are the long- hand version – created to help me understand what they did. They are not condensed and they are not in the “EPA preferred table format”. There are likely misspellings and missing information. I did not get to review large sections of the document, and there are a lot of areas where the LWG did not show their work (or I can’t find it). I cannot make the meeting tomorrow so “yea!” I guess I don’t get any assignments!
